Ganpat Kumar

Team Head at GMU | Ex-full-stack developer & tutor intern at
BucketStudy | Aspiring Java Full Stack Developer | Spring boot |
Java | Frontend Technology | MySQL | MongoDB
Samastipur, Bihar, India

Summary

A strong interest and hands-on experience in backend development.
I primarily work with Java, Spring Boot, MySQL, and REST APIs,
and I enjoy building secure and scalable applications that solve real-
world problems.

I've worked on multiple backend projects, including a Payroll
Management System, Bookstore API, Social Media Analytics
Dashboard, and an AI-powered chatbot, where I handled API
development, database design, authentication using JWT, and
backend logic. I also gained practical experience as a full-stack
developer & tutor intern at BucketStudy, collaborating with teams
and working on real-time project tasks.

I'm passionate about learning new technologies, writing clean
code, and continuously improving my problem-solving skills. I'm
currently looking for opportunities as a software engineer or backend
developer where I can contribute, learn, and grow in a professional
environment.

Experience

BucketStudy
Full Stack developer & Tutor
June 2025 - December 2025 (7 months)
Maharashtra, India

Gnyanamani Educational Institutions
Blog/Vlog Team Head
April 2025 - December 2025 (9 months)
Namakkal, Tamil Nadu, India

As the Head of the Blog/Vlog Team at Gnyan Media Universe (GMU) — the
official media club of Gnyanamani Educational Institutions — I am responsible

for leading and managing all creative content initiatives related to student life, events, and achievements on campus.

I create and manage student blogs and vlogs that showcase campus life, events, and achievements. I handle content planning, guide team members, and help bring fresh, engaging stories to our college media platform.

Vidyam classes

Java Software Developer

June 2024 - June 2024 (1 month)

India

it's a very good experience, in which I have learn to many things and hands on practice with Java development.
